THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING PPQ HEADQUARTER OFFICIAL VIA EPERMITS.  <b>Karen Brady</b>	DATE  <b>02/21/2007</b>
---	-------------------------------

**PERMIT CONDITIONS**

This permit authorizes the importation of the listed articles, under the conditions specified below. A copy of this permit (including all conditions) must accompany all shipments authorized under this permit.

1. The plant material should be selected from apparently disease-free and pest-free sources, free of weed seeds (including noxious weed seeds), soil, and other prohibited matter; securely packaged to prevent loss in transit; and sent to the Plant Inspection Station at the port(s) above, using the enclosed green and yellow label(s). Instructions for use are on the reverse of the label which may be used for either mail or air freight shipments. To prevent delay at the port of entry, the permittee's name and address should be written on a sheet of paper placed inside the package.
2. Upon arrival in the United States, the plant materials will be inspected by a representative of Plant Protection and Quarantine (PPQ) and if found apparently free from exotic pests, diseases, weed seeds (including noxious weed seeds), soil, and other prohibited matter, will be returned to the permittee, the mails, or to the carrier for delivery to the permittee.
3. All wood packing material (WPM) present with this shipment must meet the requirements of the importing and destination country and is subject to ISPM 15 treatment and IPPC stamp requirements and enforcement.
4. Prior to use, all imported plant materials are to be labeled "Quarantined material - to be used only in accordance with a valid Departmental permit", and are to be stored in a locked cabinet or other secure place under the control of the permittee to prevent pilferage and unauthorized use.
5. The plant materials are to be used solely for analysis under the direction of the permittee in the laboratory facilities of BioDiagnostics Inc., located in River Falls, Wisconsin. Propagation of plant material imported under this permit is prohibited. The imported plant materials may not be distributed to any person without permission from this office.
6. At the conclusion of the tests, all imported plant materials not consumed by the tests, are to be destroyed by sterilization in an autoclave or incineration. All containers (including shipping containers), which were used for the imported plant materials are to be incinerated or sterilized in an autoclave after use. All utensils, equipment, etc., which came into contact with the imported plant materials are to be sterilized or thoroughly cleaned, with the wash water being boiled for 15 minutes or disposed of into a municipal sewer system.
7. The facilities where the work is performed with the imported plant materials are subject to inspection by a PPQ representative.
8. You must keep your permit valid for the duration that plant materials are in your possession. If the permit holder leaves the institution where the plant material is kept, all plant material must be destroyed unless a new individual who assumes responsibility for continued maintenance submits a PPQ Form 588 and obtains a permit prior to the permittees departure. If any information changes (i.e. telephone number or address), you must notify our office immediately with the changes.
